## Art Museum Offers Photography Workshops

This July, the Art Museum of South Texas (1902 N. Shoreline Blvd.) is offering two workshops in digital photography from the basics to beyond. Advance registration is required and class size is limited. The instructor for both classes is Judith Curiel, a local artist and MFA graduate from Texas A&M University-Corpus Christi. For more information, contact 361/825-3504 or [artmuseum@tamucc.edu](mailto:artmuseum@tamucc.edu).

### Scanography Digital Workshop

**Tuesday, July 6**

**1 – 4 p.m.**

**Art Museum Digital Studio**

As the art of digital photography has evolved, many photographers and artists have begun using ordinary flatbed scanners to create high quality, close-up digital photography of a wide range of subjects. The process goes by various names such as *scanner photography*, *no-camera photography*, *scanner art* and *scanography*. This workshop is for those who already have experience taking digital pictures and want to learn additional ways to work with images. **Cost:** \$30-members; \$36-nonmembers.

### Digital Photography Basics and Beyond

**Saturday, July 24**

**10 a.m. – 4 p.m.**

**Art Museum Digital Studio**

This workshop is designed for those who already have a digital camera but want to gain a better understanding of how it works and how to edit photos for the best outcome. The class will use Adobe Photoshop software, but participants may bring their own laptop with other software used for photo editing as well as the camera they plan to use. **Cost:** \$35-members; \$42-nonmembers.
